

## **Comberton Village College Curriculum Immersion Days**

Every year, we collapse our Key Stage 3 and 4 school timetable for 2 days in order to give our pupils an even deeper, broader curriculum.

In year 7, our pupils are all given the opportunities to:

- discover more sports and activities to broaden their physical education curriculum.
- study the impact of climate change in an innovative, cross-curricular way.

Our year 8 pupils take part in:

- a variety of modern foreign language activities, including the study of ancient Italy, capoeira, salsa and Mandarin (for those who do not already study it).
- their field trip to study coastal erosion at Walton-on-the-Naze.

In year 9, our pupils are immersed in a more in-depth study of environmental and sustainable education through our English, Mathematics and Science departments.

Our year 10 pupils cover core elements of their Key Stage 4 curriculum, including:

- listening to a talk from a Holocaust survivor, learning about civil rights and refugees (core RPE).
- studying human rights and democracy (core Personal Development).
- core Computing.
- learning about the dangers of on-line addiction.
- discovery of a wide variety of careers through our careers carousel (over 60 employers in 2024).

In year 11, those pupils studying arts and / or technology subjects follow personalized programmes of practical examinations and controlled work in these areas. Pupils who are studying all other subjects follow a programme of targeted revision and examination techniques in English, Mathematics, Science and Modern Foreign Languages as well as further opportunities to develop their core Computing skills and, to create more balance and breadth, a practical session on CPR.
