EXPECTATIONS & ATTIUDES

When attitudes, behaviours and beliefs in society have the effect of normalising and trivialising sexual violence. This culture includes misogyny, rape jokes, sexual harassment, online sexual abuse (upskirting, non-consensual sharing of intimate photos, cyberflashing), and sexual coercion. When behaviours such as these are normalised this can act as a gateway to more extreme acts such as sexual assault and rape.

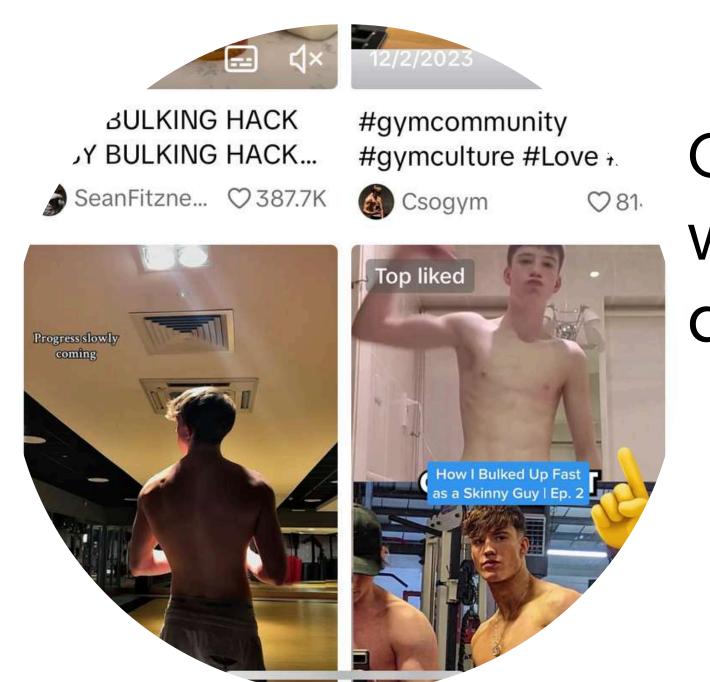

"In more gender-equal societies men are half as likely to be depressed, less likely to commit suicide, have around a 40% smaller risk of dying a violent death and even suffer less from chronic back pain.

Adolescent boys in those countries have fewer psychosomatic complaints and are more likely to use contraceptives" It also goes without saying, the more equality, the less violence there is"

- Create a controversial online presence

The MISOGYNY SANDWICH

Research suggests...

Excessive monitoring does not reduce children's phone usage

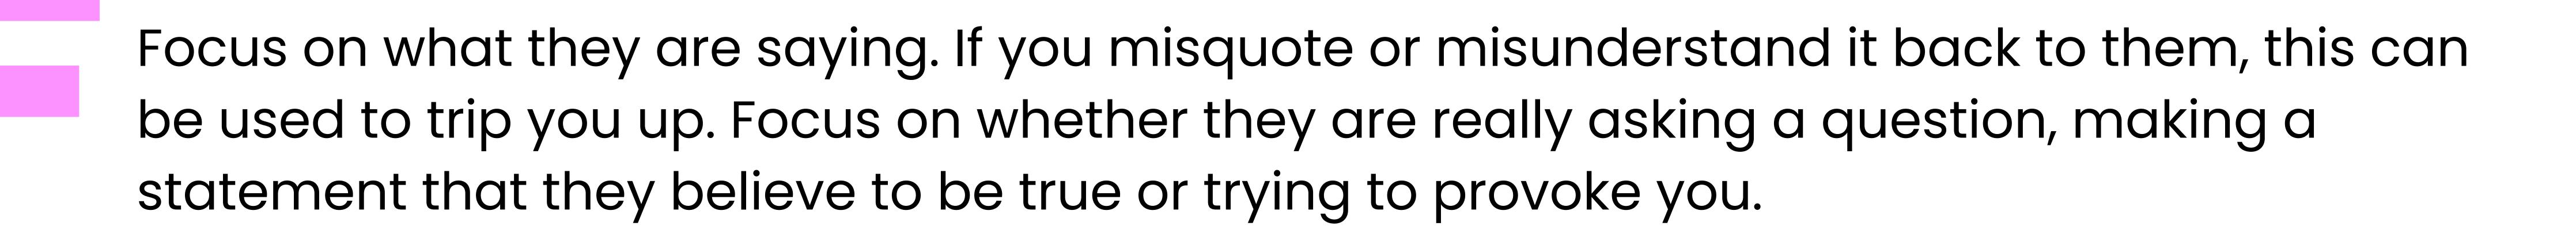

This could also normalise the behaviour for them in relationships or with friends

"If you do monitor, you should disclose that to your kids, "Do it with them or with their knowledge. Tell them what you are looking for."

"What is on the internet is not private, yet it feels private. It's about joining with them to keep them safe and to help them practice regulating their thoughts and emotions.

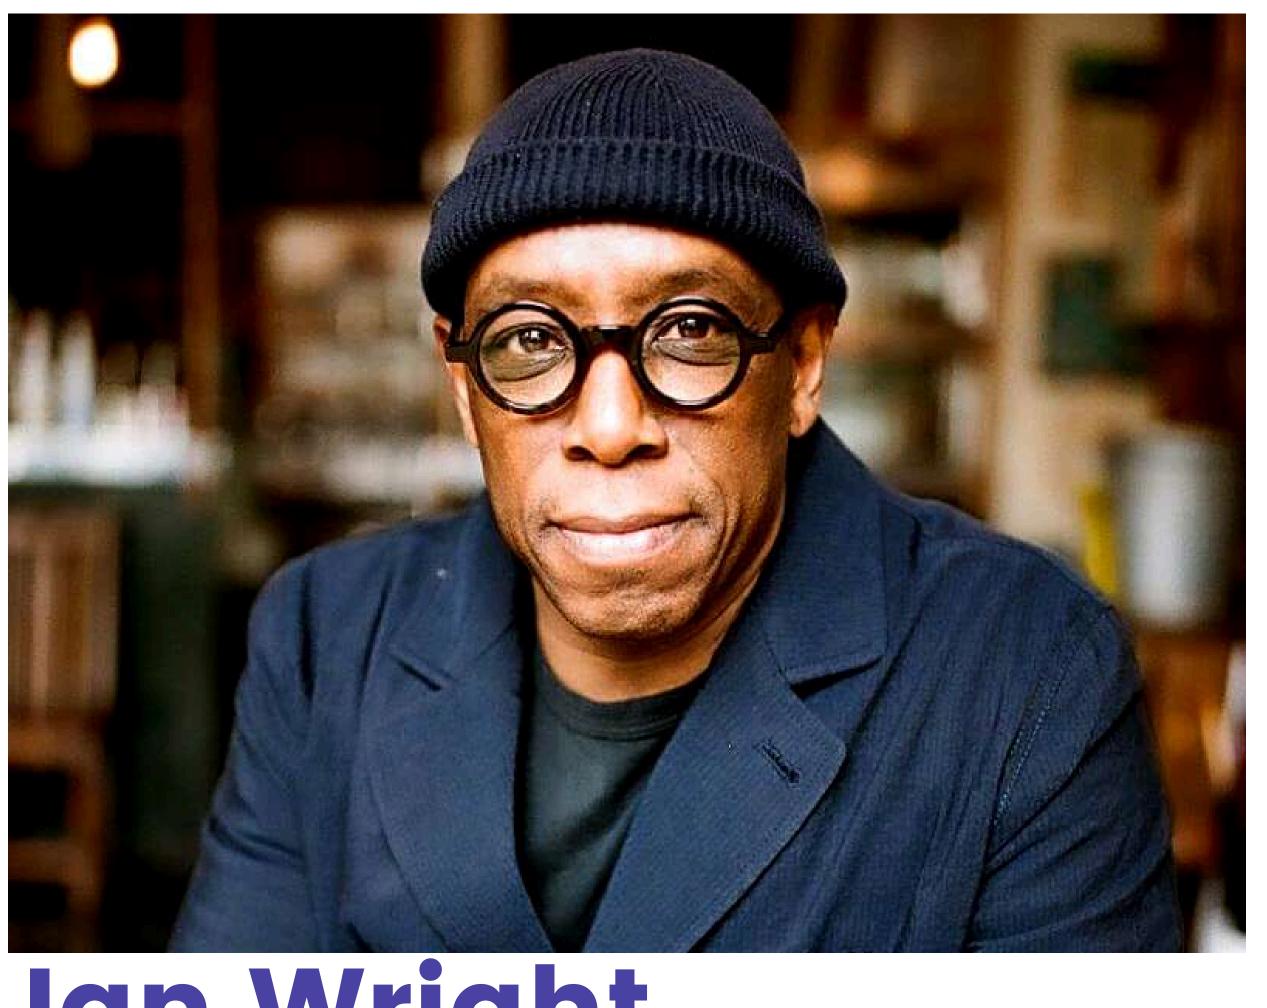

"Show them experiences you have had with texting," "Engage with them. Ask them what they would do if they noticed a friend was being left off a group text."

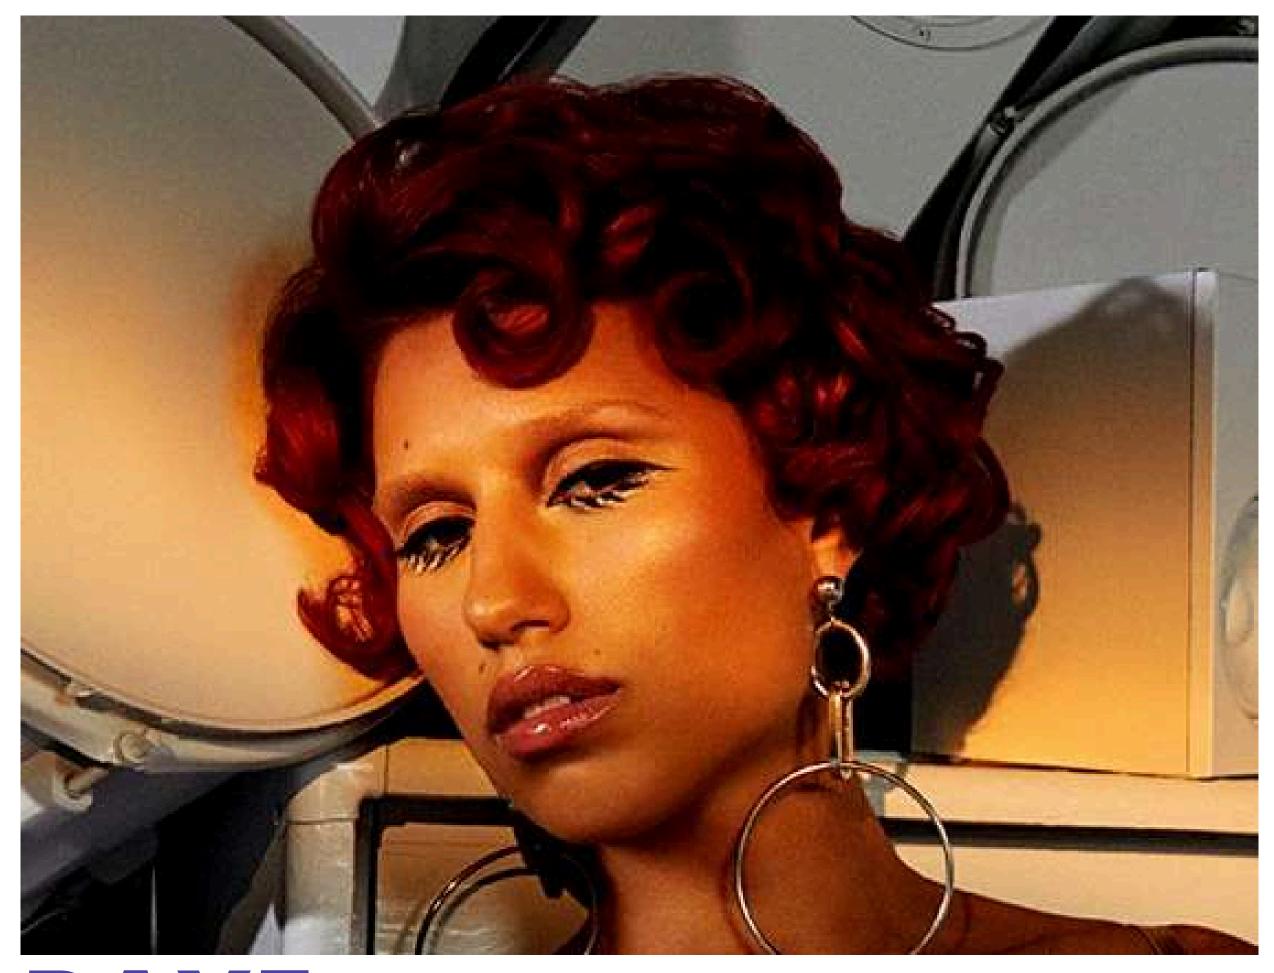

Inhale. Take a beat before you answer or talk to them about the comment or joke they just made. When we go straight into having a conversation about this - it is very easy for our emotions to take over.

Verify. Ask them where they heard that idea, where they read it etc - verify the claim and ask them to explore whether that's true, or just a learned idea of what is true.

Explain/Empathise. Explain why that comment/joke could be offensive or how it might make other people in the room feel - encouraging them to empathise.
